PROCEEDINGS OF THE THIRD ALL-UNION CONFERENCE ON  
REFRACTORY MATERIALS

This conference, held in Moscow from 12 - 16 May 1945, summarized results of the activity of scientific establishments and workers in the refractory industry and discussed the essential problems of manufacturing and using refractory materials created by specific wartime requirements. Basic reports and decisions of the conference are included in this symposium.

TABLE OF CONTENTS

	Page
Academician A. A. Baykov. Introductory speech	5
Ya. A. Gol'din. The refractory industry during the last war and its recent problems	8
S. V. Glebov. Main trends in the wartime development of the refractory industry abroad	17
I. S. Kaynarskiy. Methods for intensifying the technology of Dinas and improving its qualities	34
E. K. Keller and V. N. Abramova. Improving the properties of brick for the shaft lining of a blast furnace	43
S. A. Zhikharevich. Methods for improving fundamental physicochemical properties of blast furnace brick	55
G. V. Glebov. Basic refractories in roofs of open-hearth furnaces	68
A. S. Frenkel'. Application of basic high-refractory materials for lining the upper structure of open-hearth furnaces	80
G. V. Nagibin. Experience of operating open-hearth furnaces with chrome-magnesite roofs	94
